*(Simplex Printing)*

## Positive Payee Friendly - PPF

**What is Positive Payee Recognition?**
Positive Payee Recognition is an anti-fraud service offered by many US commercial banks, protecting companies against altered checks and counterfeit check fraud.

**Example of how it works:**
A company issues payroll checks and then transmits the issued check’s information i.e. payee, check number, date and amount to the bank. As the payroll is processed, the bank verifies the submitted information matches the checks. The **PPF** checks have been designed not to interfere with the scanning systems of the processing bank.

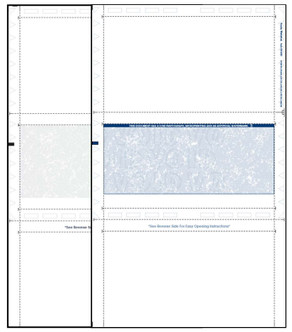

**PPF Security Feature:**
Warning Band, Microprinting, Coin Reactive Artificial Watermark
Thermochromic Ink on backer.

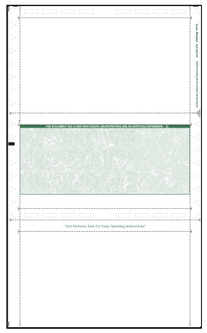

**Z811B2-PPF** (11” even Z-Fold)

All VersaSeal® Checks are Check21 compliant and meet all current postal regulation for bulk rate discounts.
Designed for use on pressure seal folding and sealing machines.
