

SECURESTAR

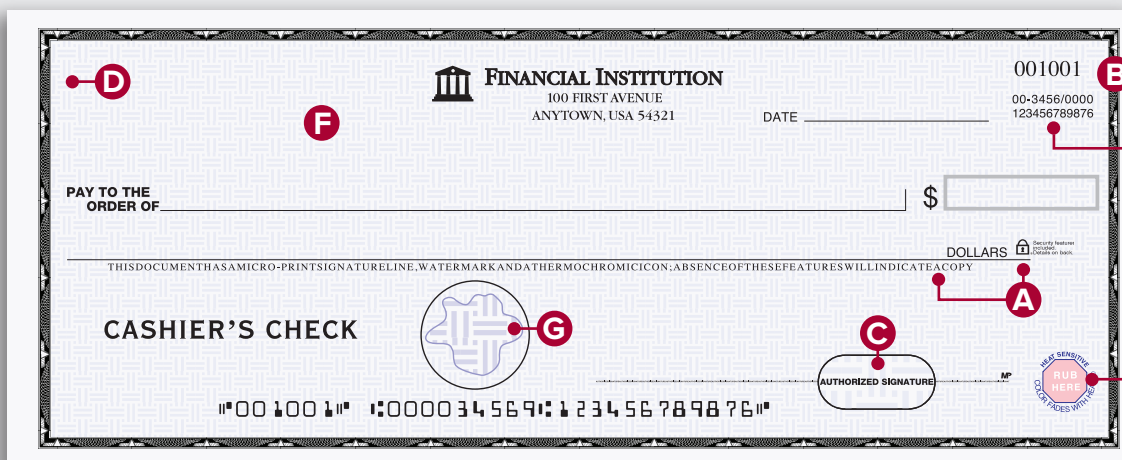

Security Solutions

SECURESTAR® makes it practical and affordable to protect every at-risk document issued by financial institutions.

All SECURESTAR® documents are protected with the standard features shown on this page. Additional security features, true hologram, foil and prismatic background, are available for an additional charge.

Visible features designed to deter fraud.

- A. Padlock Icon, Warning Band and Warning Backer** – A padlock symbol is printed on the face of the document indicating the security features that are listed on the back side. The Padlock Icon design is a certification mark of the Check Payment Systems Association.
- B. Guaranteed No Missing Numbers** – Assurance that all of your documents are present.
- C. Microprint Signature Line** – The words “Authorized Signature” are repeated several times in type too small for copiers to duplicate. Words become dots when duplicated.
- D. High-Resolution Borders or Backgrounds** – Intricate design details are difficult to accurately or cleanly reproduce on scanners or copiers.
- E. Thermochromic Ink Icon** – Placing a thumb over the icon for a few seconds alters the appearance of the icon.
- F. True Fourdrinier Watermark** – Actual watermark in the paper that is impossible to duplicate. To view the watermark, hold the check up to the light.

Hidden features to enhance check security.

- G. Full Chemical Reactivity** – If chemical alteration is attempted, visible discolored blotches will appear.
- H. Invisible Embedded Fibers** – Invisible embedded fibers are ultraviolet, light-sensitive fibers in the paper stock and can be seen only under ultraviolet light.
- I. Securely Packaged** – As an added measure of security, all official checks are packaged with a tamper-evident security seal on every box.

The SECURESTAR® Check Program is the most practical and affordable way to get the peace of mind you need to avoid check fraud.

BD-1 ICR

Bank Draft without Lines

BD-2 ICR

Bank Draft with Lines

Bank Draft duplicate and triplicate are printed same as cashier's check.

Duplicate is printed on white paper.

Triplicate is printed on pink paper.

NOTE: Remitter Line is automatically printed on orders for triplicate sets unless indicated otherwise. On duplicate sets, Remitter Line is not printed unless requested.

The **ICR** means that the printed designs and colors have been tested to meet ANSI's guidelines which mandate that the "areas of interest" on the check will drop out at the proper print contrast signal (PCS).

Specs

Size: 3 $\frac{3}{8}$ " x 9 $\frac{1}{8}$ " (includes $\frac{3}{4}$ " stub)

Colors: Yellow, Blue, Gray and Green

Parts: Unit Sets

Paper: Original 24# SECURESTAR® Safety. Duplicate, Triplicate or Quadruplicate – 24# Bond

Minimum Order: 250

Normal Order: 1,000

Economy Order: Multiples of 5,000

Fraud protection at affordable prices.

SECURESTAR® Basic Bank or Personal Money Orders and Counter Checks

MOP ICR

Large Personal Money Order, Blue and Gray
3 3/8" x 9 1/8" (includes a 3/4" stub)

MOPS ICR

Small Personal Money Order, Gray Only
3" x 7" (includes a 3/4" stub)
Available in Unit Sets Only

NOTE: The word "Remitter" will be printed automatically, unless specified otherwise.

Original and triplicate are given to purchaser and duplicate becomes financial institution's register copy.

MO-1 ICR

Money Order without Lines, Blue and Gray
3 3/8" x 9 1/8" (includes a 3/4" stub)

Duplicate is printed on white paper.

Triplicate is printed on pink paper.

SECURESTAR® Laser Checks are printed on Printloc® toner-fusing paper, which increases toner adhesion so it is difficult to alter or remove information from the document without destroying the paper.

Since your software and hardware determine the line placement, we ask, for first time orders, that you provide a voided check sample.

Laser Check Numbering Options

Use the following guide to determine check numbering:

Standard Ascending printer pulls from top, face up in tray, lowest number on top.

Reverse Ascending printer pulls from top, face down in tray, lowest number on top.

Standard Descending printer pulls from bottom, face up in tray, highest number on top.

Reverse Descending printer pulls from bottom, face down in tray, highest number on top.

Please indicate on your order which numbering option (A, B, C or D) fits your laser printer. To choose which numbering option fits your system best, conclude whether the documents require reverse or standard numbering by determining if the documents are placed face up or face down in the tray and whether the printer pulls from the top or the bottom of the tray.

Unique designs combined with holograms provide high security.

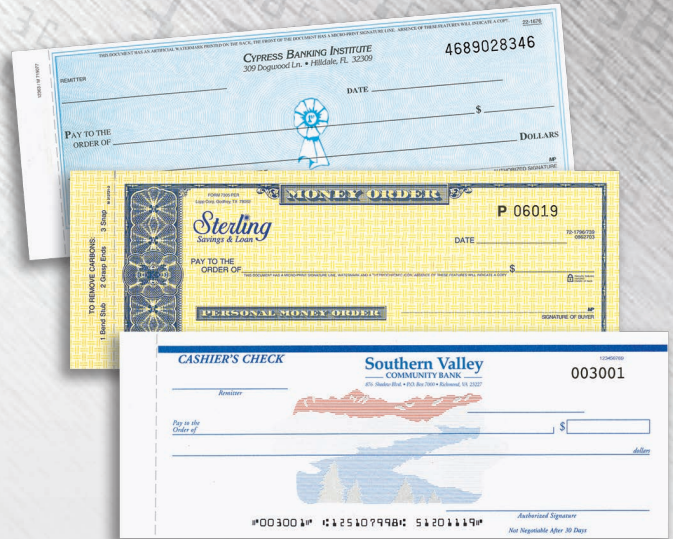

Custom Official or Laser Checks

Custom Official Checks

In addition to our safety paper checks and standard prismatic background checks, you also have the option of designing custom official checks that contain your logo or an image that represents your institution.

These images can be repeated throughout the background or shadow printed at the center. Build your custom check by selecting a background, colors, border treatment, paper option and more.

The SECURESTAR® security features will be included in paper selection as well as printing options. This is your check and you can determine how many features are incorporated according to your needs.

Custom Laser Checks

Tailor your checks to work for you. Our experts will produce checks to work with your software and the options are endless. Use your company colors, logo and any other information to make your checks unique.

Available with:

- Full-Color Printing
- Many Standard Ink Colors Available
- Variety of Security Features

Blank Checks

If you print your own checks or just the MICR line, partially or non-imprinted checks are available in multiple check positions and perforations to match your software.

Managed Check Program

Perfect to use when you order checks for multiple locations. Our managed check program allows you to manage usage by location and tailor the reordering of checks based on each location's volume.
